

Free Used Oil & Recycling Program

Keeping used oil out of the environment shouldn't cost municipalities extra time, money, or stress. [Protex Environmental](#) offers a no-cost used oil collection and recycling program designed to support municipalities, shops, public works departments, transfer stations, and local residents.

What We Collect — FREE OF CHARGE

- Used oil
- Oil filters
- Oil containers & pails
- Used coolant / antifreeze
- Related oil recycling materials

We also supply all required collection drums and bags at no cost.

How the Program Works

- Protex Environmental provides proper collection containers
- Materials are safely stored onsite until pickup
- Our team services the RM on a regular schedule
- Pickups are completed once minimum collection volumes are reached (typically 1,000L+ for oil)

This helps ensure safe handling, environmental compliance, and reduced fire and contamination risk.

Why Municipalities Are Switching

Cost Savings

Many businesses and municipalities are still paying for used oil disposal services unnecessarily. Our program removes those costs entirely.

Environmental Protection

Improperly stored or disposed oil can contaminate soil and groundwater and create significant fire hazards.

Simplified Collection

We make the process easy with supplied containers, scheduled pickups, and ongoing support.

Community Benefit

Offering proper recycling access encourages responsible disposal practices across the region.

Ideal Collection Partners

- Municipal shops
 - Public works departments
 - Equipment yards
 - Transfer stations
 - Ag operations
 - Repair facilities
 - Trucking companies
 - Heavy equipment operations
-

Interested in Setting Up Collection?

We'd be happy to discuss how the program could support your RM and surrounding area.
